Problem Statement

- Campus announcements and activities can be scattered across different channels.
- Students may find it difficult to keep track of events and participation.
- Attendance motivation and student rewards need clear, transparent rules.
- Students need one simple place to view canteen orders and campus credits.

Our Solution: CampusLoop

CampusLoop brings campus discovery, participation, and rewards into one web application.

Discover

Explore upcoming and ongoing campus activities.

Participate

Submit posters and banners for admin review.

Earn Rewards

Collect tokens through approved contributions and attendance incentives.

Key Features

- Campus Credits Wallet with balance and transaction history.
- Canteen orders showing items, cost, and order status.
- Poster/banner submissions with admin approval.
- Campus calendar assistant powered by Gemma 4.
- Weekly attendance rewards calculated by fixed backend rules.
- Role-based access for Student, Teacher, and Admin/HOD.

Campus Credits Wallet

Simple and transparent conversion

100 tokens = ₹10

1 token = ₹0.10

- Earn tokens through approved activities.
- Use eligible tokens for canteen refreshments.
- Review wallet balance and transaction history.
- Token balance is controlled by the application, not by AI.

Weekly Attendance Rewards

The highest qualifying reward is issued once after a week is finalized.

Below 70%	**0 tokens**	No bonus
70% to <80%	**200 tokens**	₹20 equivalent
80% to <90%	**300 tokens**	₹30 equivalent
90% to 100%	**500 tokens**	₹50 equivalent

Gemma 4 AI Assistant

- Students can ask natural-language questions about campus activities.
- The application supplies relevant calendar information as context.
- The assistant helps summarize information and guide students.
- Required model: gemma-4-26b-a4b-it.
- AI does not approve submissions or modify token balances.

Gemma 4

Technology Stack

Frontend

HTML, CSS, JavaScript

Backend

Python and Flask

Database

SQLite

AI Model

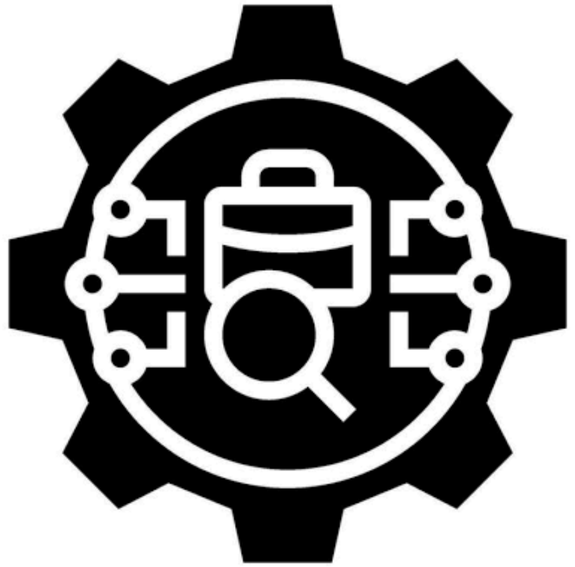

Gemma 4 API

Security

Role checks, secret key in .env

How CampusLoop Works

- Student signs in and views activities, wallet, and orders.
- Student submits a poster or banner for review.
- Admin reviews the submission and approves or rejects it.
- Teacher records attendance for scheduled classes.
- Backend calculates the weekly reward and records the transaction.
- Gemma 4 answers campus questions using relevant context.

Security and Fairness

- Role-based access prevents unauthorized actions.
- One token ledger is the source of truth for balances.
- Weekly rewards should not be duplicated for the same student and week.
- Corrections should be recorded in an audit trail.
- API keys must remain in .env and must never be committed to GitHub.

Demo Plan

- Log in as a student and show the dashboard.
- Show wallet balance and transaction history.
- Ask Gemma 4 about a campus event.
- Show poster submission and admin review.
- Demonstrate weekly attendance reward logic.

Future Scope

- Mobile App Integration
- Real-Time Notifications
- Expanded Campus Rewards
- Student Performance Analytics

Only demonstrate features confirmed to work in the live build.
